PROJECTS

Mental Health Support Platform

A frontend web application developed as part of a team project designed to provide accessible mental health guidance and support resources. I served as Team Lead, contributing to requirement gathering, UI design planning, feature selection, workflow distribution, and presentation.

Portfolio Website

A personal portfolio website built using HTML, CSS, and JavaScript to showcase my skills, education, achievements, and projects. This project reflects my web development fundamentals, aesthetic layout sense, and ability to present technical content in a professional format.
